

PROVISIONAL CHOICE FOR SELFS AND SORTING UNIT CASINGS

Our supplier Egger is unable to supply us with the new colours indicated in our 2024 price list until further notice. The choice of self-service units and sorting units can be selected from the 18 colours above:

Front cladding supplied: included in price and furniture code. Made of double-sided water-resistant melamine panels (CTBH counterbalanced), 16mm thick, with veneered edges.

Additional side trim: double-sided water-resistant melamine panels (CTBH counterbalanced) 16mm thick with stainless steel corner protectors or stainless steel panels.

Please consult us for other possible colors, delivery times and prices.

SURFACE STRUCTURE

ST2 DIAMOND

Resistant mini pearl structure with medium gloss. Particularly suitable for metallic decors and basic plains.

ST9 MAT

Very shallow structure with a satin-touch matte surface. Gives plains a very natural texture and wood decors a real veneer effect. Excellent resistance to abrasion, scratches and fingerprints.

ST10 AUTHENTIC

Matte structure with a pronounced rusticity. Adds authenticity to wood, stone and mineral decors.

ST22 MATEX

Deep structure, strongly brushed, characteristic of linear woods. Very natural feel.

ST12 OMNIPORE MATT

Unevenly distributed wood pore structure of varying depths, giving it a natural, authentic character. Silky touch thanks to a light substructure.
